The journey is opened by Capsula, a new talent from Israel with a trippy chillout track filled with acidic-patterns and alive sounding synths. Followed by the chilenean trance artist Ovnimoon presenting his first chillout track "Jabarei" and leading us to the mysteries of the ancient south america. Dejan hijacks the listener to a thrilling atmosphere in another dimension with flowing pads and smooth beats and leads us to Derango who are telling us an ancient tale of the swedish forests in a very atmospheric and relaxed track.

The indian calls of Terra Nine's "Axiom" can already be heard. The Omm Squad from Down Under is showing us the beautiful sounds of India with dreamy pads in this dub influenced remix.

Meet the "Psychedelic Child" in Kukan Dub Lagans track dancing to groovy goatrance influenced downbeats in the "Asian Morning" when Cell brings us more ethnic sounds and high energy rhythms until Electrynose chills us down to an exstatic atmosphere. Psyfactor presents his first ambient track with spooky alien chillout beats and slowly the trip goes to its end with Capsula leading you back to the earth with an acid-soaked track and a sonic surprise in the end.
